

TRADEMARK OWNER CONSENT

respecting the .owl Top-Level Domain

Open World Learning Inc. (“OWL”), the owner of the OWL trademarks (the “Licensed Marks”, as defined and particularized in Schedule A to the Trademark Licence and TLD Authorization Agreement between OWL, as Licensor, and Intercap Registry Inc., as Licensee (the “**Licence Agreement**”)), provides this consent in connection with the application by Intercap Registry Inc. (“Intercap Registry”) to the Internet Corporation for Assigned Names and Numbers (“ICANN”) for the delegation of the .owl top-level domain (the “TLD”) as a .Brand TLD under Specification 13 to the Base Registry Agreement (“Specification 13”). Capitalized terms used but not otherwise defined have the meanings given in the Licence Agreement or in Specification 13.

OWL hereby consents to, and authorizes, Intercap Registry to:

- (a) apply for the TLD;
- (b) prosecute the application for the TLD;
- (c) execute the Registry Agreement;
- (d) establish, operate, maintain and administer the registry for the TLD, and provide Registry Services;
- (e) use the Licensed Marks for all purposes reasonably necessary to apply for, establish, maintain and operate the TLD;
- (f) authorize Backend Registry Service Providers and other ICANN-approved subcontractors and registrars to use the Licensed Marks, as contemplated by the Licence Agreement;
- (g) submit this consent to ICANN; and
- (h) permit ICANN and the .Brand TLD Eligibility Evaluation Panel to rely upon this consent.

This consent is granted in connection with, and is consistent with, the Licence Agreement. This consent remains effective throughout the application process for the TLD and throughout the operation of the TLD, unless and until replaced by another written authorization granted by OWL consistent with Specification 13. In the event of any inconsistency between this consent and the Licence Agreement, the Licence Agreement governs.

OPEN WORLD LEARNING INC.
