Building the most secure wallet in the ecosystem while keeping users in control

Security Audits

Security is at the core of our development. Our libraries have been audited by security experts and independent researchers. Reports are public:

- Diligence - August 2025 - mUSD contract [report](#)
 - Additional mUSD M^Zero Labs contract audits: [ChainSecurity](#), [Guardian](#)
- OtterSec - October 2024 - LavaMoat Webpack Plugin [report](#)
- Diligence - October 2024 - Delegation Framework [report](#)
- Diligence - August 2024 - Delegation Framework [report](#)
- Diligence - June 2024 - Delegator [report](#)
- Cure53 - April 2024 - Key-Tree Interface [report](#)
- Cure53 - March 2024 - Signing Snap & Codebase [report](#)
- Least Authority - September 2023 - Snaps [report](#)
- Least Authority - September 2023 - Snaps Extension Integration [report](#)
- Cure53 - February 2023 - Key-Tree Interface [report](#)
- Least Authority 2022 - Seed Phrase Implementation [report](#)
- Least Authority - March 2020 - LavaMoat Plugin [report](#)
- Least Authority - November 2019 - Permissions System + CapNode [report](#)
- Least Authority - April 2019 - Mobile App [report](#)
- Cure53 - August 2017 - MetaMask Pentest [report](#)

MetaMask Bug Bounty

[GET METAMASK](#)

We work with an active community of security researchers through our Bug Bounty Program to continually improve the security of MetaMask.

Your participation in this Bug Bounty Program is voluntary and subject to the terms and conditions set forth below. By reporting a vulnerability to MetaMask, and thereby Consensys, you acknowledge that you have read and agreed to fully comply with the rules disclosed in this program.

Reporting a vulnerability

If you believe you've identified a potential security vulnerability in our products or services, please report it to us using one of the following options. Please do not file a public issue or discuss the vulnerability in public places like Discord, Slack, Twitter, etc.

Reporting options, if you think you found a vulnerability:

- Submit a report through the HackerOne platform <https://hackerone.com/metamask>
- If you cannot use HackerOne, we appreciate direct reports sent to bugbounty@consensys.net. If you have data that you feel is particularly sensitive and would like to encrypt before sending it to our bug bounty, please use the [OpenPGP](#) key for encryption at the bottom of this page.
- Blockchain Security specialists and members of our DeFi Community wanting access to our authenticated test environment can request access to our Consensys programs <https://hackerone.com/consensys>.

We will make the best effort to address all vulnerabilities as soon as possible and coordinate the disclosure of the finding with the researcher. All other non-security related bugs in the codebase should be filed as an issue on [GitHub](#).

Policy for responsibly disclosing vulnerabilities to the public

Our responsible disclosure policy employs a process where vulnerabilities are first triaged and addressed in a private manner, and only publicly disclosed after a reasonable time period. This allows the vulnerability to be patched and an upgrade path for users. The responsible disclosure policy helps protect users of the project from publicly disclosed security vulnerabilities prior to a patch being released.

Please refrain from malicious acts that put our users, the project, or any of the project's team members at risk.

[GET METAMASK](#)

Please do not disclose your findings outside this Program until we have had the opportunity to review and address them with you.

[Follow HackerOne's disclosure guidelines.](#)
