MetaMask Builder Hub is now live—a dedicated space for developers [GET METAMASK](#) and innovate.

Whether you've been working with MetaMask SDK, building Smart Accounts, or integrating Embedded Wallets, Builder Hub is your go to place for discussions, support, and staying up to date with what's happening across the stack.

What's changing?

We're consolidating MetaMask developer communications into one place. Previously, developer discussions were scattered across different channels. Now, everything lives under the Builder Hub, making it easy to find what you need, connect with other builders, and get answers faster.

If you're a developer moving over from Web3Auth: we've preserved context from earlier discussions to make the transition as smooth as possible. Your threads, guides, and migration documentation have moved to the Embedded Wallets section in the Builder Hub.

Key Builder Hub features

- **Direct collaboration and support:** Join discussions, get help from the MetaMask team alongside peer developers, and solve SDK & feature challenges quickly.
- **Community-driven knowledge:** Access official documentation, plus real-world guides, tutorials, and best practices from other developers.
- **Recognition and growth:** Get visibility for your contributions and discover mentorship opportunities within the community.

Why this matters

With everything in one place, you'll spend less time searching and more time building. If you're a new developer, you can discover the right tools faster; if you're an experienced builder, you can get quicker access to updates and direct lines to the team.

Getting started

[GET METAMASK](#)

Login to builder.metamask.io, introduce yourself, and explore the community.

Questions?

Post directly in [Builder Hub](#) and we'll help you get onboarded.

Builder Hub is where MetaMask developers connect, collaborate, and build together. See you there!
