Goods and services

Class numbers and list of goods and services

CI 09 Downloadable computer application software for use with blockchain-based platforms, namely, software for distributed applications and software using blockchain technology for managing digital asset transactions and securely sharing digital asset and transactional data on a blockchain; Downloadable or recorded computer software platforms for developing and building of distributed software applications using blockchain technology; Downloadable software development kits (SDK); Downloadable application programming interface (API) software for software programming; Downloadable computer software for managing smart contracts using blockchain technology; Downloadable computer software for managing, validating, and verifying cryptocurrency transactions on a blockchain; Downloadable software for enabling the staking of cryptocurrency assets and digital tokens in the nature of managing and verifying cryptocurrency transactions on a blockchain and allowing interactions between end-users regarding digital assets; Downloadable computer software for creating, managing, storing, accessing, sending, receiving, exchanging, validating and selling digital assets, digital collectibles, digital tokens and non-fungible tokens; Downloadable electronic publications in the field of digital asset transactions, decentralized technology and finance and in the field of decentralized applications and developer documentation

CI 35 Providing business consultancy, networking and partnership services in the field of blockchain and decentralized technologies, digital assets, and virtual currencies; Business development services for ecosystem participants; Promoting the use and adoption of decentralized protocols and digital asset technology

CI 36 Cryptocurrency and digital asset services, namely exchange, trading, payment verification, settlement, valuation, and information services, all provided via decentralized blockchain networks; Cryptocurrency lending provided via decentralized finance (DeFi) protocols; Cryptocurrency staking services in the nature of cryptocurrency payment and funds verification; Cryptocurrency trading services provided via decentralized exchanges (DEXs); Decentralized finance services, namely, peer-to-peer financial services in the nature of staking of cryptocurrency assets and digital tokens of value using distributed ledger technology; Financial exchange of cryptocurrency via decentralized exchanges (DEXs); Financial services, namely, providing a decentralized and open source cryptocurrency on a global computer network utilizing blockchain technology for use in staking protocols on blockchains; Electronic transfer of cryptocurrency; Financial exchange of crypto assets; Provision of information relating to digital asset transactions and decentralized financial protocols

CI 41 Educational services, namely, developing, arranging and conducting classes, seminars, workshops, hackathons, conferences and online training in the field of blockchain technology, decentralized protocols, validator participation and digital asset infrastructure; providing non-downloadable publications, instructional materials and training resources relating to blockchain networks, and decentralized applications

CI 42 Design, development, maintenance and implementation of blockchain networks, distributed-ledger systems and related protocols; Providing temporary use of online non-downloadable software for operating decentralized networks and for executing, clearing, recording and verifying transactions via blockchain; Research, development and consultancy in the field of blockchain, distributed-ledger technology (DLT), and financial-technology infrastructure; Software development services in the fields of distributed computing platforms and blockchain; Providing temporary use of a decentralized computing platform for creating, managing, storing, accessing, sending, receiving, exchanging, validating and selling digital assets, digital collectibles, digital tokens and non-fungible tokens; Providing a decentralized computing platform for validating transaction data on blockchain and managing electronic payment transactions using distributed ledger technology (DLT); Platform as a Service (PaaS) featuring computer software platforms for facilitating cryptocurrency staking and cross platform blockchain transfers; Platform as a Service (PaaS), namely, cloud-based computer software platform services for liquid staking of cryptocurrency assets; Providing a web site featuring technology that enables users to participate in staking of cryptocurrency; Providing online non-downloadable software for authenticating, facilitating, matching, processing, clearing, storing, receiving, tracking, transferring, and submitting transaction data and managing digital asset transactions; Providing temporary use of online non-downloadable software for cryptocurrency staking; Software as a Service (SaaS) featuring cloud-based computer software for facilitating liquid staking of cryptocurrency and digital assets, and software for enabling cryptocurrency staking; Providing online non-downloadable software that enables interoperability of tokens across different blockchains
