MetaMask in 2025

One wallet for everything that matters to you.

MetaMask

🕒 5 minutes

📅 December 18, 2025

2025 has been a banner year for crypto. We've seen big shifts in the regulatory picture, broad institutional adoption and digital asset treasuries, plus expanding consumer offerings and

excitement around primitives like prediction markets. Our industry is on the cusp of true
MetaMask streaming. [GET METAMASK](#)

It's been [a banner year for MetaMask too](#). We've been working hard over the last 12 months to bring you the best version of MetaMask yet, continuing to build the most secure, powerful, and usable self custodial wallet in crypto.

Here's how we made it happen.

Our roadmap realized

Everything we shipped this year was built around three priorities:

Make it easy: Simplify transactions so you can focus on what you're doing, not how you're doing it.

Make it seamless: Streamline interconnectivity letting your assets and networks interact naturally within one connected experience

Make it powerful: Strengthen self custody with tools that give you deeper security and insight

These pillars shaped features like multichain support, integrated trading, Rewards, MetaMask Card, and a redesigned interface—so your wallet can now handle a lot more, with a lot less effort.

Move freely across networks

Your portfolio can finally move as one, even when your assets live on many chains.

Support for [Solana](#), [Bitcoin](#), [Monad](#), and [Sei](#) means you can hold and trade crypto from major ecosystems in one place, instead of juggling separate wallets. [Multichain accounts](#) let connected apps talk to several networks at once, so rebalancing, bridging, or deploying across networks fits into a single flow.

Trade, explore, earn

Advanced DeFi is now part of your everyday toolkit.

GET METAMASK

You can trade perpetual futures, equity perps, and prediction markets directly inside MetaMask, without sending assets to a centralized exchange. Whether you're just exploring the ecosystem or deep into DeFi positions, you have one home where you can trade and discover opportunities across the ecosystem securely.

Get rewarded for your activity

Our [MetaMask Rewards](#) program turns your everyday activity into real value.

Swapping, trading, spending, and referring generates points that unlock network discounts, token allocations, airdrop qualifications, and early access opportunities. The more you use it, the more value you get from the things you were already doing.

Use your crypto anywhere

You can now use crypto to spend IRL.

[MetaMask Card](#), available in both Virtual and Metal tiers, lets you spend crypto from your wallet anywhere Mastercard is accepted. It pulls directly from your account balance so your funds keep working for you right up to the moment you pay—earning yield, stacking Rewards points, and unlocking exclusive cardholder benefits. With our new stablecoin, mUSD, you can hold stable value, amplify your earnings, and tap to spend, all without giving up custody.

Hold and spend stable value

Speaking of [mUSD](#), it gives you a foundation across the entire ecosystem.

Hold US dollar pegged value that powers everything: Card payments, Rewards cashback, yield opportunities, and smooth transfers between trading and spending. You can park funds safely, earn on them, and spend instantly without relying on external bridges or volatile tokens. It ties your activity together using the same steady asset you already control.

Your in app experience, simplified

[GET METAMASK](#)

We've enhanced your in app interactions, making them smoother and more powerful, combining advanced trading tools like perps and prediction markets with everyday usability like network fees included into your quotes. Here are a few:

Integrated Swaps: Bridging is now built into swaps, with routes and network fees shown in your quote.

Transaction Shield: Our first of its kind [monthly subscription](#) provides up to \$10,000/month in transaction protection, and fast priority support.

Quick setup: Social logins and device sync reduce friction when you're getting started, moving across devices, or restoring access.

Streamlined transactions: Network fees across 6 chains are automatically included in your quotes.

Updated screens: Cleaner interfaces let you easily review routes and outcomes before confirming.

2026 and beyond

This is just the beginning. What we're building is the future of finance, one that's open and global. In 2026, we'll take it even further.

"Self custody remains the constant, and your wallet experience will keep getting easier," shares MetaMask's Product Lead, Gal Eldar. "All of this serves a single purpose: making it simple and safe for anyone to participate in global markets, online and in the real world."

We're continuing to evolve MetaMask, connecting your assets, actions, and opportunities into one home: the wallet that lets you get more out of crypto, everywhere you go.
