What is Avalanche?

Avalanche is a general-purpose blockchain platform founded by Cornell University professor Emin Gün Sirer. Developers can deploy decentralized applications such as decentralized finance, gaming, and NFTs via smart contracts. Validators secure the network through a proof-of-stake consensus protocol, which allows for fast and low-cost transaction processing.

How Does Avalanche Work?

We process your personal information to measure and improve our sites and service, to assist our marketing campaigns and to provide personalised content and advertising. By clicking the button on the right, you can exercise your privacy rights. For more information see our [privacy notice](#)[More information](#)

What is AVAX Token?

AVAX token is Avalanche's native currency. It is used to pay transaction fees, and users can participate in securing the network by staking AVAX tokens.

Where can you buy Avalanche?
