Why this extract is provided

The register extract translated above is a certified extract of the trademark register. This J-PlatPat register screen is provided together with it because it independently confirms, from the Japan Patent Office's own published record, the two facts material to the present application:

1. The registration is in force. The term was renewed on application of July 17, 2025 and registered on July 22, 2025, and the term of the right now expires on December 26, 2035. This corresponds to Entry No. 4 of the register extract.
2. The holder of the trademark right is Nippon Television Holdings, Inc. The register extract itself records the entries of the Display Section and does not name the holder on its face; the register screen supplies the holder of record.

The registration is the same in both documents — the same registration number, filing date, mark and class.

Translator's note: this is an English translation of a public register screen retrieved from J-PlatPat and reproduced as a screen capture of the record as displayed. Japanese field labels are given with their JPO / WIPO ST.60 numeric codes where the source supplies them. Where the source gives a Japanese era date, the Gregorian year printed by the source has been used. Elements of the page that are navigation controls rather than record content (buttons, links and the site header) are not translated. JPO similar-group codes (類似群コード, for example 38B01) are an internal search aid of the Japan Patent Office, carry no substantive legal content, and are reproduced without translation. In the event of any discrepancy, the Japanese source record prevails.
