Why this extract is provided

The Certificate of Trademark Registration reproduced above was issued by the Commissioner of the Japan Patent Office upon registration in **2015**. A registration certificate records the fact of registration as at its date of issue; by its nature it cannot record events occurring afterwards. This register extract supplies the two such facts material to the present application:

1. **The registration has been renewed and remains in force.** The renewal was applied for on September 30, 2024 and registered on October 2, 2024, and the duration of the right now expires on March 27, 2035.
2. **The name of the holder of the trademark right has since changed.** The certificate names Sompo Japan Nipponkoa Insurance Inc.; the register now records the holder as Sompo Japan Insurance Inc. (損害保険ジャパン株式会社). The change of trade name took effect in 2020. The registration itself is unchanged —the same registration number, filing date, mark and classes —and the entity is the same juridical person under its current name.

The holder of the trademark right, Sompo Japan Insurance Inc., is a consolidated subsidiary of the Applicant, Sompo Holdings, Inc. The Applicant's rights in respect of the mark derive from that relationship within the Sompo Group.

The entry "(591) Colour claimed" confirms that colour forms part of the registered mark, consistent with the red-and-silver circular device described in the translation of the certificate above. The captured screen reproduces that device in colour under the heading (540).

Designated goods and services. The captured screen sets out the designated goods and services for each of Classes 35, 36, 41, 42, 43 and 44. Those designations are the same as those of the registration translated in the Certificate of Trademark Registration above, and the English text there applies equally to them; they are not repeated here. The screen additionally shows JPO similar-group codes (類似群コード, for example 35B01) beside each class. Those codes are an internal search aid of the Japan Patent Office, carry no substantive legal content, and are reproduced in the original without translation.

Translator's note: this is an English translation of a public register extract retrieved from J-PlatPat on 2026-08-05, taken as a screen capture of the record as displayed. Japanese field labels are reproduced with their JPO/WIPO ST.60 numeric codes where the source supplies them. Where the source gives a Japanese era date, the Gregorian equivalent printed by the source has been used. Elements of the page that are navigation controls rather than record content (buttons, links and the site header) are not translated. In the event of any discrepancy, the Japanese source record prevails.
