* Entries flanked by XX in the original indicate matters superseded in the register. Such entries are reproduced here struck through and tagged [struck].

* The registration is recorded as in force, with the term of the right expiring on February 25, 2033. That date appears on the J-PlatPat printout and not on the register extract.

* The mark was registered in Class 24 under the former Japanese classification in 1983. The designated goods were rewritten into Class 15 of the International Classification on August 20, 2003. Both are reproduced; the Class 15 designation is the current one.

* The register extract does not reproduce the mark itself. The mark shown is taken from the gazette page and the J-PlatPat printout in the same bundle.

* The register records five successive changes in the indication of the registered proprietor. Only the first states a cause (a transfer of address in 1993); the remainder state none, and no cause has been supplied here for them.

* This is a complete English translation of the original Japanese documents. In the event of any discrepancy, the original Japanese documents prevail.
