

Japan Patent Office —Trademark Register (登録原簿) and Trademark Gazette

Registration No. 4887305

Source. This is an English translation of the two Japanese documents reproduced above for Japanese trademark registration No. 4887305: (i) the certified extract of the trademark register (商標登録原簿) issued by the Japan Patent Office, and (ii) the Trademark Gazette (商標公報) published on its registration. Both concern the same registration. The register extract is reproduced first because it records the current state of the right; the gazette is reproduced second because it records the mark and the goods as published at registration.

The gazette sets out the designated goods and services in full for each of the fifteen classes. Those designations are reproduced in the Japanese original and are not repeated here; the classes are listed above.

Why both documents are provided

The Trademark Gazette records the mark as published on registration in **2005**, and names the holder as it then stood. By its nature it cannot record anything that happened afterwards. The register extract supplies the three facts material to the present application:

1. **The registration has been renewed twice and remains in force.** The most recent renewal was applied for on May 23, 2025 and registered on **May 27, 2025**.
2. **The holder's name has changed.** The gazette names Asahi Denka Kogyo K.K.; the register records a change in the indication of the registered holder to **ADEKA CORPORATION (株式会社 A D E K A)**, registered on August 16, 2006. The registration itself is unchanged —same registration number, same filing date, same mark —and the holder is the same juridical person under its current name. ADEKA CORPORATION is the Applicant.

3. **The scope now stands at thirteen classes**, Classes 21 and 40 having not been carried forward at the 2015 renewal.

Translator's note: this is an English translation of a certified extract of the Japanese trademark register and of the corresponding Trademark Gazette, both for registration No. 4887305. Japanese field labels are given with their JPO/WIPO ST.60 numeric codes where the source supplies them. Japanese era dates have been converted to the Gregorian calendar; where the source prints both, the source's own Gregorian rendering has been used. The designated goods and services are extensive and are reproduced in full in the Japanese original rather than restated here; the class numbers are given in full above. In the event of any discrepancy, the Japanese source documents prevail.
