

ME PĒNEI TE MAHI? |

HOW THIS WORKS?

Each iwi data roadshow begins with an overview of Te Kāhui Raraunga and a brief introduction to the key concepts including:

- Indigenous data sovereignty
- Māori data sovereignty
- Māori data governance

Then you will receive a bespoke workshop. Follow the steps below to shape your workshop

(Please note: A full day workshop is 6 hours so your choices will have to fit within that timeframe)

1. Choose one Te Whata workshop option.

2. Choose as many Digital and Māori Data Modules options as you'd like

3. Our team will be in touch to shape the agenda, based on your options
4. We deliver the workshop to you in your rohe at a date and time that works for you

We're bringing bespoke data tools, knowledge, and support directly to whānau, hapū, and iwi.

Our aim is to empower you to access, use, and grow your own data and digital aspirations, using Māori-led platforms and approaches.

Each roadshow session is customised to meet your iwi's needs and future goals.
