

TE PĀ TŪWATAWATA

DECENTRALISED IWI-DESIGNED MĀORI-OWNED DATA STORAGE

Experience the highest degree of protection and security, without compromising your collective values, privacy and principles.

Protecting your digitalisable taonga and mātauranga

Te Pā Tūwatawata is a decentralised, iwi-designed and Māori owned data storage network, developed by **Te Kāhui Raraunga**.

Our premium service provides you with the highest degree of data protection and security, without compromising your collective values, privacy and principles.

Te Pā Tūwatawata houses your data in a secure environment, with technology specifically configured to allow for the expression of your tikanga and kawa.

Key information

- S3 Compatible
- Seven distributed locations
- 100% Māori owned with data redundancy through NZ-owned data centres only
- Infrastructure designed for secure, fast and seamless access
- Multiple size storage solutions built to scale with you
- From marae to enterprise grade, storage that is right-sized to meet your needs for today and tomorrow

TE PĀ TŪWATAWATA

Geographic sovereignty

Your data is stored in a physical location chosen by you and is held subject to the tikanga and kawa that you define.

Highest levels of security and safety

Full end-to-end encryption both while your data sits within your storage repository and during transfer.

Māori data governance

Your data is kept secure, accurate and available in line with the Māori Data Governance Model, a values-led framework, centred on Māori needs and priorities, and informed by research.

Whakapā mai

Te Pā Tūwatawata will be available to iwi, hapū, whānau Māori and Māori businesses later this year.
