Re: Statement of Support for the Cardano Foundation's Top-Level Domain Application for .ada

Dear Sir/Madam,

PRAGMA is a member-based, not-for-profit Open Source Association for blockchain software projects, including Cardano and Cardano-based projects. PRAGMA is a team of passionate software engineers from various backgrounds who build open-source tools for developers. PRAGMA is an active member of the Cardano Community, and stewards certain core infrastructure. PRAGMA enables sustained collaboration among developers and organizations, contributing to shared technical resources.

PRAGMA submits this letter to indicate its support and endorsement to ICANN for the Cardano Foundation's top-level domain application for .ada, a project set out in the Cardano Foundation's Info Action which Cardano Community members across the globe voted on. This Info Action passed with overwhelming support, with 74.53% positive votes.

A number of positive votes on the Info Action contained the following endorsements or expressions of Cardano Community members:

- Socious: "We voted in favor of this proposal. Securing the .ada and .cardano domains will help protect Cardano's brand identity, improve discoverability, and ensure trusted representation of the ecosystem on the internet"
- AdaStat: "I believe that the existence of the .ada and .cardano domains fully serves the interests of the Cardano ecosystem."
- Emurgo: "EMURGO recognizes this as a critical, forward-looking investment in Cardano's brand integrity and digital sovereignty. Acquiring .ada and .cardano generic top-level domains proactively safeguards our ecosystem's identity from misuse and establishes a trusted foundation for future growth. \n\nThe fact that the Cardano Foundation is fully funding this initiative demonstrates strong alignment with its core mission and delivers immense strategic value to the entire community at absolutely no cost to the treasury. This is a prudent and necessary step.\n\nConclusion:\n\nEMURGO as a DRep votes YES, fully supporting this initiative to secure vital digital assets that are inherently linked to our identity and future."

PRAGMA has reviewed the Cardano Foundation's plans for the top-level domain and we are excited for the opportunities this namespace will create for our global community. We believe that the Cardano Foundation is the entity which is best positioned to act as the registry operator for this domain, and allowing another entity to control this domain would harm the interests of the Cardano Community.

PRAGMA would therefore like to express its support for the Cardano Foundation's top-level domain application.

Sincerely,

A handwritten signature in black ink, appearing to read "Christina Gianelloni", written over a horizontal line.

Christina Gianelloni
