Members can see each other

The community's public member map, the periodic table of agents. Member organizations are listed and grouped, and members can browse by category, by region, and by organization type. Members edit their own entries. agentcommunity.org/map

The screenshot displays the ".agent community" directory page. At the top, there's a navigation bar with links for "Map", "Events", "About", and "Resources". Below this, a breadcrumb trail shows "Home > Directory". The main content area features a "periodic table of agents" grid. The grid is organized into rows and columns, with each cell containing an agent's logo and name. A large central banner reads "The Agentic Web THE PERIODIC TABLE OF AGENTS". The grid includes various agents such as AceCoder, Agen, Amp, Autohand AI, BoltAI, Bugster, Chaterm, Cline Bot Inc., Codapt Inc., Codebase, Codeflash, CodeRabbit, Cognition, Deepwork Labs, DevAssign, Dot-AI, Factory, Feynman, FHL Creative, Firebender, Fomo Driven Developm..., GammaCode, Hackerman, Indent, JetBrains, Kilo, Legrand.design, Lumea, Manaflow, Miles, Mixar, Moiz Haider, Nash Terminal, Natively, Navi, noSwag, OpenRewrite, Operative, Origin Labs, PureCode AI, Qodo, Rails-AI, Replit, Replrt, Savoir, Sellers H. Crisp, Show, Sovereign Firm, Spittfire AB, Stably, stagewise, Stakpak, Superuser Labs, Supri Singh, Sutro, Tempest Labs, TestDriver, TesterArmy, The Pair, UICandy, VedaVerse, Very Ok Productions, VibeCode, Vly.ai, and IDEAS. The grid is numbered 1 through 65. A sidebar on the left contains navigation icons for home, search, and various filters. The top of the grid has a row of filters including "NEW", "Alter", "NexO Oy", "SuperMIA", "Grupo Insurex", "ChatHome", "Suryachandra.com", "akn Systems Ltd", "Tja", and "Know Organization".

And where they are

The same map on a globe. Each column marks a location where members are based, and its height rises with the number of members there. agentcommunity.org/map

Member survey within the endorsement letters

Individual and organization endorsement letters included a short survey about the signer and its work. Reproduced below is one organization's completed survey page.

ENDORSEMENT LETTER

.AGENT Community TLD Application — Organisation

Date: 03/24/2026

To: Community Priority Evaluation Panel, ICANN

Subject: Organisation Endorsement of the .AGENT Community TLD Application

Dear Panel Members,

1. Organisation background

Replit ("the Organisation") is active in software and AI development, including autonomous-agent technology.

Primary segment (*select one*): agent-powered-products

Organisation size (*optional*): 51-200

2. Community recognition

We recognise the .agent Community as the worldwide group of developers, companies, and researchers who design, build, deploy, or meaningfully use autonomous software agents and related tooling.

3. Why .AGENT matters

In the AI industry, "agent" refers to autonomous software entities that perceive, reason, and act on behalf of users or other systems. A dedicated .AGENT namespace will:

- Provide a **trust signal** that a domain is operated in connection with legitimate agent technology;
- Improve **discovery and interoperability** across agent ecosystems; and
- Establish **vendor-neutral infrastructure** for a technology category that should not be controlled by any single commercial entity, comparable to the role .edu serves for qualifying universities.
