15-17 NOVEMBER 2026

OLYMPIA CONVENTION CENTRE
LONDON

THE FUTURE OF MONEY, IN THE CITY THAT INVENTED MODERN FINANCE.

Over the past year, Solana has seen major institutional and regulatory momentum—from J.P. Morgan and Goldman Sachs to SEC classification—alongside \$650B in monthly stablecoin settlement.

Breakpoint 2026 convenes builders, institutions, and policymakers in London to shape the future of internet capital markets.

Why Breakpoint

[REGISTER ↗](#)

The institutional turn

Last year, J.P. Morgan, Goldman Sachs, BlackRock, State Street, and Citigroup all deployed production capital on Solana. At Breakpoint, the teams behind these integrations share what's next - and what they need from builders.

The infrastructure leap

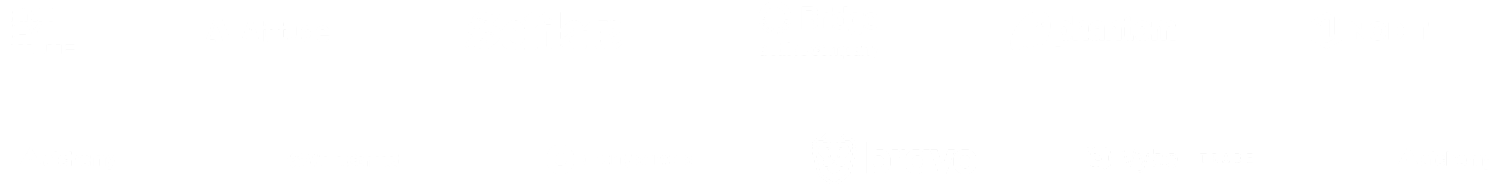

The builder economy

“My thoughts on Breakpoint 2025: The most utility based conference so far. Everything people were dreaming about 5 years ago, everything that was a wild dream is now reality. Whoever organises Breakpoint just gets better and better every year. What a masterclass. It will just keep getting better and better.”
