

TRADE MARKS REGISTRY

REGISTRATION CERTIFICATE

Trade Marks Act 1994 of

Great Britain and Northern Ireland

I certify that the mark shown below has been registered under No. UK00003980248 effective as of the date 16/11/2023 and has been entered in the register on 16/02/2024

Signed this day at my direction

Adam Williams
REGISTRAR

Representation of Mark LYRIA

The mark has been registered in respect of:
Class 9:

Downloadable software using AI (artificial intelligence) for the production and editing of video, images, music, sound, audio, speech and text; Downloadable software for multi-modal machine-learning based language, text, video, image, music, sound, audio, and speech processing software; Downloadable software for facilitating multi-modal natural language, speech, text, image, video, and sound input; Downloadable software for use in the fields of artificial intelligence, machine learning, natural language generation, statistical learning, mathematical learning, supervised learning, and unsupervised learning; Downloadable software for creating and generating images, music, sound, audio, and video from text; Downloadable software for creating, producing, editing, manipulating, transmitting, uploading, downloading, and sharing electronic media, multimedia content, videos, pictures, images, music, sound, audio, and text via the Internet; Downloadable computer software for use in generating, editing, posting, displaying, streaming, linking, sharing or otherwise providing electronic media or information via computer and communication networks; Downloadable computer application software for mobile devices and handheld computers, namely, software for generating, editing, and sending digital photos, videos, images, music, sound, audio, and text to others via the global computer network; Downloadable computer software for modifying the appearance and enabling transmission of photographs and videos; Downloadable software for use in

processing and generating natural language queries; Downloadable application programming interface (API) software; Downloadable computer software using artificial intelligence and machine learning for generating music, speech, text, sound, code, videos, images, and sound outputs; Downloadable intelligent personal assistant software using artificial intelligence and machine learning for generating music, speech, text, sound, code, videos, images, and sound outputs; Downloadable computer chatbot software for simulating conversations; downloadable chatbot software in the nature of a mobile application for simulating conversations; downloadable software featuring a conversational artificial intelligence assistant.

Class 42:

Providing online non-downloadable software using AI (artificial intelligence) for the production and editing of video, images, music, sound, audio, speech and text; Providing online non-downloadable software for multi-modal machine-learning based language, text, video, image, music, sound, audio, and speech processing software; Providing temporary use of online non-downloadable software for facilitating multi-modal natural language, speech, text, image, video, music, audio, and sound input; Providing online non-downloadable software for use in the fields of artificial intelligence, machine learning, natural language generation, statistical learning, mathematical learning, supervised learning, and unsupervised learning; providing information from searchable indexes and databases of information, including text, music, sound, audio, images, videos, software algorithms, mathematical equations, electronic documents, and databases, by means of non-downloadable chatbot software; Providing online non-downloadable software for creating and generating images, music, sound, audio, and video from text; Software as a service (SAAS) services for building, managing, updating, developing, training, evaluating, and monitoring generative user experiences powered by machine learning, deep learning, and artificial intelligence; Providing online non-downloadable software for creating, producing, editing, manipulating, transmitting, uploading, downloading, and sharing electronic media, multimedia content, videos, pictures, images, music, sound, audio, and text via the Internet; Providing online non-downloadable computer software for use in generating, editing, posting, displaying, streaming, linking, sharing or otherwise providing electronic media or information via computer and communication networks; Providing online non-downloadable computer software for mobile devices and handheld computers, namely, software for generating, editing, and sending digital photos, videos, images, music, sound, audio, and text to others via the global computer network; Providing online non-downloadable computer software for social networking and interacting with online communities; Providing online non-downloadable computer software for modifying the appearance and enabling transmission of photographs and videos; Providing online non-downloadable computer software for viewing and interacting with a feed of images, music, sound, audio, audio-visual and video content and associated text and data; Providing online non-downloadable computer software for finding content and
