

# SUI token supply and circulation

Sui Mainnet launched publicly on May 3, 2023. The network's native token, SUI, facilitates on-chain transactions, pays gas fees, secures the network, and provides on-chain liquidity. The SUI token supply is capped and has a long-run circulating supply of 10 billion tokens. At Mainnet launch, roughly 5% of all tokens were in circulation with the remainder being released on a proposed schedule, as shown in the graph below, to maintain network stability.

The total supply has been apportioned in a manner to support those who contributed to the launch of Sui Mainnet and ensure its ongoing health through a vibrant, active community.
