Programs & funding

Elevate your project with accelerator programs, strategic guidance, and deep ecosystem insight. Whether you're raising funds, growing users, or boosting traction — Sui provides the support to scale with purpose.

Ecosystem programs

Join a program designed to help early-stage founders launch, grow, and raise on Sui.

Hydropower

Sui Foundation's official accelerator, offering hands-on support, mentorship, and connections to capital. No equity is taken up front for joining the program.

DeFi Moonshots program

An initiative focused on the top teams building the next category-defining DeFi protocol on Sui. Selected teams may receive up to \$500k in liquidity incentives, direct collaboration with DeFi engineering specialists, and more.

Funding your vision

We know fundraising can be one of the toughest parts of building. That's why we focus on connecting serious founders with meaningful, long-term support - not grants.

Academic research awards

If you're doing research that pushes forward the science or security of blockchain tech, you can apply for the \$25k research award through this program.

Direct investment from Sui Foundation

For high-impact projects aligned with Sui's long-term goals, the Foundation may make direct, strategic investments—typically in teams building core primitives or ecosystem-wide apps.

Venture capital partners

Sui proudly partners with investors who support our ecosystem. The following funds publicly back Sui builders:

Sui ecosystem fundraises

Alternative fundraising methods

Launched the Popkins NFT collection exclusively on Sui. Selling 25k NFTs at \$200 a mint, the team generated \$5M when they minted out of the collection.

Sui ecosystem use cases

Sui builders drive growth through wallet campaigns and strategic partnerships. Explore their success stories:

OKX launched the “xBTC Phase 1 on Sui” campaign on June 24, 2025, offering over \$2.8 million in rewards for supplying xBTC, USDC, or SUI to NAVI, Bluefin, or Momentum. This attracted liquidity to xBTC-SUI and xBTC-USDC pools and incentivized borrowing on NAVI. As a result, the campaign boosted xBTC adoption, increased DeFi activity on Sui, and promoted further ecosystem growth.

NAVI Protocol and OKX launched a \$700,000, two-month campaign on Sui starting June 24, 2025, to promote xBTC lending and borrowing. They introduced supply incentives for xBTC, followed by USDC and SUI borrowing rewards. Participants earn real-time rebates and APR boosts based on xBTC collateral. The initiative aims to grow xBTC’s DeFi utility, increase Sui liquidity, and establish BTCfi as a key part of the Sui ecosystem.

OKX cryptopedia

OKX Cryptopedia launched the “Momentum” campaign on June 25, 2025, offering \$935,000 in MMT rewards through August 24. Users earn MMT by completing tasks like social actions, swapping or staking tokens, and providing liquidity to key pools. With over half a million participants, the campaign drives user onboarding, strengthens liquidity for major Sui pairs, and positions MMT as a core token in Sui’s DeFi ecosystem.

TBTC: powering BTCfi on Bluefin

Bluefin launched the “TBTC: Powering BTCfi on Bluefin” campaign to grow Bitcoin-based DeFi and the tBTC ecosystem on Sui. Through a Galxe quest, users complete social tasks and provide \$10+ liquidity to the tBTC/LBTC pool to earn rewards like tokens, loyalty points, and NFTs. Additionally, Bluefin offers over 11,000 SUI and 1.7M BLUE tokens for adding liquidity to xBTC pools. The campaign boosts user engagement, expands liquidity in BTC trading pairs, and advances BTCfi adoption on Bluefin.
