REGISTRATION CERTIFICATE

Trade Marks Act 1994 of

Great Britain and Northern Ireland

I certify that the mark shown below has been registered under No. UK00004194719 effective as of the date 25/04/2025 and has been entered in the register on 22/08/2025

Signed this day at my direction

Adam Williams
REGISTRAR

Representation of Mark META AI

The mark has been registered in respect of:

Class 9:

Downloadable application programming interface (API) software for use in developing ai (artificial intelligence) platforms, namely, bots, virtual agents and virtual assistants; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for controlling stand-alone voice controlled personal assistant devices; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for facilitating interaction and communication between humans and ai (artificial intelligence) platforms, namely, bots, virtual agents and virtual personal assistants; Downloadable software for facilitating interaction and communication between humans and ai (artificial intelligence) platforms; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for the artificial production of human-like speech and text; Downloadable computer chatbot software for simulating conversations; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for using artificial intelligence for use as a digital companion; Downloadable personal assistant software; Downloadable artificial intelligence personal assistant software for performing tasks or services on behalf of a user that is activated by user input, location awareness, and online information;

Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for machine-learning based language and speech processing software;
Downloadable software for using artificial intelligence for machine learning;
Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for use in connection with language models; Downloadable software for using artificial intelligence for conversational query; Downloadable software for using artificial intelligence for speech or language recognition and translation;
Downloadable software for using artificial intelligence for processing, generation, understanding and analysis of natural language into machine-executable commands;
Downloadable artificial intelligence software for accessing, browsing, and searching online databases; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for facilitating interaction and communication between humans and ai (artificial intelligence) platforms, namely, bots, virtual agents and virtual personal assistants; Downloadable computer virtual assistant software, downloadable mobile application virtual assistant software, and downloadable computer application virtual assistant software that can perform tasks or services on behalf of a user that is activated by user input location awareness, and online information; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for natural language processing, generation, understanding and analysis; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for creating, generating and modifying images and videos from text commands; Downloadable computer software, downloadable mobile application software, and downloadable computer application software, all for creating and generating videos from text commands; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for creating and generating images from text commands; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for use in connection with large data models for the creation, generation and modification of images and videos from text commands; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for use in connection with large data models for the creation and generation of images from text commands; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for machine learning based image creation, generation, and modification from text commands; Downloadable computer software, downloadable mobile application software, and downloadable computer application software for mobile devices and computers, all for machine-learning

telephone calls, text messages, electronic mail, and other digital data, and for use in providing access to the internet; Magnetically encoded credit cards and payment cards; Laser equipment for non-medical purposes; Earphones; Electronic sensor devices, cameras, projectors, and microphones for gesture, facial, and voice detection, capture and recognition; Cameras; Battery case; Battery packs; Power charging and power management devices for mobile electronic devices; Electrical adapters; Electrical and electronic connectors; Bags, protective covers, and cases for mobile devices and smartglasses; Faceplates; Facial interfaces; Customizable fitted plastic films known as skins for covering and protecting electronic apparatus, namely, mobile electronic devices, tablet computers, headsets, glasses, earphones, headphones; Electrical audio and speaker cables and connectors; Docking stations for mobile electronic devices; Cables for optical signal transmission; Headset straps; Wireless transmitters and receivers for reproduction of sound and signals; Wearable computers in the nature of activity trackers in the form of vests using haptic technology; Wearable computers in the nature of physical interface between the virtual world and a user's skin in the form of vests using haptic technology; Optical lenses; Stylus pens for touch screen devices.

Class 42:

Providing online non-downloadable software, software as a service (SAAS) services, and platform as a service (PAAS) services featuring software for controlling, integrating, operating, connecting, and managing internet of things (IoT) enabled devices and voice controlled information devices, namely, cloud-connected and voice- controlled smart consumer electronic devices and electronic personal assistant devices; Providing online non-downloadable personal assistant software, software as a service (SAAS) services and platform as a service (PAAS) services featuring personal assistant software; Providing online non-downloadable software, software as a service (SAAS) services, and platform as a service (PAAS) services featuring software for mobile devices and computers, all for the artificial production of human-like speech and text; Providing online non-downloadable software, software as a service (SAAS) services, and platform as a service (PAAS) services featuring software, all for natural language processing, generation, understanding and analysis; Providing online non-downloadable software, software as a service (SAAS) services, and platform as a service (PAAS) services featuring computer chatbot software for simulating conversations; Providing online non-downloadable software, software as a service (SAAS) services, and platform as a service (PAAS) services featuring software for using artificial intelligence for processing, generation, understanding and analysis of natural language into machine executable commands; Providing online non-downloadable software, software as a service (SAAS) services, and platform as a service (PAAS) services featuring software for mobile devices and computers, all for using artificial intelligence for use as a digital companion; Providing online non-downloadable software and software as a service (SAAS) services featuring software for use in connection with language models; Providing online non-
