[Sui Builder House: Singapore](#) just wrapped up, and the community showed up big time! The event was buzzing with exciting announcements, fun-filled activities, and endless conversations among community members and key industry leaders.

In just one day, more than 600 people from across various communities and industries gathered in Singapore, all on the hunt for alpha. Big announcements from [Circle](#), [Decrypt](#), [DeLorean Labs](#), and [One Championship](#) took center stage and turned heads. But it wasn't just the announcements—some of the activities managed to steal the spotlight at times too.

Sui Builder House: Singapore housed over 600 people across three floors filled with activities, presentations, and networking opportunities.

“Sui is a next-generation blockchain driving the internet revolution from Web2 to Web3,” Adeniyi Abiodun, [Mysten Labs](#) CPO and co-founder, said as he kicked off the event. With industry leading performance, one of the fastest growing Web3 ecosystems, and groundbreaking innovations like [Walrus](#), Sui is establishing itself as the global coordination layer for the new internet.

As we look back, here are the top five standout moments that made Sui Builder House Singapore truly unforgettable.

Circle announces native USDC is coming to Sui

[Jeremy Allaire](#), CEO of Circle, shaped his presentation around the current landscape and future potential of stablecoins, while teasing that he'd drop some exciting news. As the presentation drew to a close, Allaire made the big reveal: USDC, one of the most trusted and transparent digital dollars, is coming to Sui.

Jeremy Allaire, CEO of Circle, announced that USDC is coming to Sui very soon.

Solana and Ethereum. Allaire's endorsement of Sui's technology and community signals the strength of this partnership and sets up the next stage of growth for Sui.

“We work with a number of different chains, and what we’ve seen from this community, and Sui itself as a technology, is super impressive.”
– Jeremy Allaire, CEO of Circle

Walrus Whitepaper dropped

The future of [decentralized storage](#) took a [big step forward](#) with the release of the [Walrus Whitepaper](#) and the upcoming launch of the WAL token. As the decentralized web grows to include more rich media—like text, audio, video, and data archives—traditional blockchains can't handle these storage requirements at scale. Walrus is positioning itself to be the go-to decentralized storage solution, offering cost-effective, scalable, and programmable storage, reinforcing Sui's position to be the global coordination layer.

The WAL token will play a crucial role in powering the Walrus network, enabling delegated proof-of-stake and ensuring reliable data storage through novel attestation challenges. The Walrus Testnet is launching soon, inviting developers to explore the possibilities that Walrus helps bring to life.

Decrypt to store all media content on Walrus

[Decrypt](#), a leading Web3 media outlet, is posting its entire content library to Walrus. As [Ilan Hazan](#), Decrypt CPO and co-founder said, “We use Web3 to cover Web3,” and now they’re showcasing that commitment by storing 100% of their content on Walrus. This transition underscores Decrypt's dedication to leveraging the best decentralized storage solution available.

Decrypt, one of the largest Web3 media companies, will be storing all of their content on Walrus.

Each article on Decentral will link to its [Walrus](#) stored counterpart, offering a clear example of how

DeLorean Labs and Sui accelerate innovation

[DeLorean Labs](#) is building on Sui, creating NFTs that represent build slots for the new DeLorean EV, granting the flexibility to the owners to interact with and even trade their DeLorean build slot. The DeLorean NFTs will remain tied to the car for its lifetime, unlocking a range of capabilities. NFT holders will even be able to drive their DeLorean in the [Motorverse](#) adding exciting layers of utility for enthusiasts.

In addition, DeLorean Labs is also offering the chance to mint your own [DeLorean time capsule](#), with one lucky minter winning a brand-new DeLorean!

One Championship punches up sports media with Sui

[ONE Championship](#), a combat sports media leader, is bringing their fan engagement into the Web3 era by building on Sui. By leveraging Sui's user-friendly onboarding tools like [zkLogin](#), ONE Championship aims to make it easier for their Web2 audience to cross into the world of Web3.

Fans will soon be able to engage with a manga series featuring ONE athletes, powered by Walrus. As part of this experience, fans can participate in a free-to-play pick'em game, with opportunities to win rewards, alongside phygital collectibles blending physical and digital elements.

Honorable Mentions

SUI & SuiPlayOX1 Giveaways

One of the exciting extras at the event was the SUI giveaways through NFC [Stashed](#) cards, with participants receiving up to 100 SUI per card. Every seated attendee was given a card, and more could be earned through event activities. Additionally, two attendees walked away with a [SuiPlayOX1 pre-order](#), adding an extra layer of excitement to the day!

Attendees earned scratch off cards allowing them to redeem an award of up to 100 SUI through Stashed.

The event's venue spanned three stories, with networking and discussions buzzing on two floors

product demos, and more, creating an engaging atmosphere for all attendees

The excitement carried into the next day, with Steve Aoki headlining Move with Sui at Marquee and giving attendees a night to remember.

Over 2,400 guests turned out for the afterparty where legendary DJ, Steve Aoki, lit up the room.

Only 1% done

Sui Builder House: Singapore was a huge success, but the excitement doesn't end here. With all the announcements, partnerships, and the community's incredible engagement, Sui is continuing to push the boundaries of what's possible in Web3.
