Re: Support for Sui Naming Limited's Application for the .sui Community Top-Level Domain

Dear ICANN Review Panel:

I write on behalf of InkRay, a decentralized publishing and opportunity platform built on Sui and powered by Walrus Protocol, in support of Sui Naming Limited's application for the .sui community generic top-level domain.

1. Our Role in the Sui Community

InkRay is an active participant in the Sui ecosystem. We provide decentralized publishing infrastructure that enables creators and communities to own, monetize, discover, and explore content without relying on centralized intermediaries.

Powered by Walrus Protocol, InkRay uses decentralized data infrastructure to support durable, verifiable, and creator-owned publishing experiences. By combining content ownership with an opportunity layer, InkRay helps connect creators, readers, communities, and ecosystem participants while showcasing practical uses of Sui and Walrus for open digital media.

Through this role, we interact with and support a meaningful segment of the Sui community.

2. Support for .sui

We support the recognition of **.sui** as the Sui community's ICANN-administered domain space. The **.sui** string is a natural and established identifier for the Sui community, and its delegation as a community top-level domain would provide Sui developers, applications, users, and ecosystem participants with a trusted namespace in the global DNS.

We also support **the Sui Foundation's** endorsement of **Sui Naming Limited** as the applicant and ICANN operating partner for **.sui**.

3. Community Benefit

A community-aligned **.sui** TLD can help strengthen the Sui ecosystem's identity layer by connecting community-native applications, naming, wallets, users, and other ecosystem participants with the established DNS.

INKRAY
Decentralized Publishing
& Opportunity Layer
<https://inkray.xyz/>

We believe this will benefit the Sui ecosystem by supporting discoverability, trust, interoperability, and community-aligned use of the **.sui** namespace.

As a decentralized publishing and opportunity platform powered by Walrus Protocol, we believe .sui can provide an important DNS identity layer for creators, publications, communities, applications, and users building and sharing content across the Sui ecosystem.

For these reasons, InkRay supports Sui Naming Limited's application for the .sui community gTLD and urges ICANN to approve the application.

Sincerely,

Alexandra-Nadia Balan
Co-Founder
InkRay
