

## **DNS Abuse Self-Certification**

The applying entity, China Internet Network Information Center (CNNIC), hereby makes the following self-certification representations and warranties regarding its DNS abuse response capabilities, mechanisms, policies, and resource allocation in connection with its application for the variant “.网络” top-level domain.

The applying entity will, no later than the delegation of the Top-Level Domain (TLD), establish a dedicated abuse point of contact responsible for addressing matters requiring expedited attention and providing a timely response to abuse complaints concerning any name registered in the TLD.

The applying entity will, no later than the delegation of the TLD, establish, publish, and provide to ICANN the location of a mechanism for members of the public to submit reports of abuse in accordance with the current obligations of the Base Registry Agreement (RA) and any applicable Consensus Policies.

The applying entity has developed proposed measures for the removal of orphan glue records for names removed from the zone when provided with written evidence that such glue records are associated with malicious conduct (see Specification 6).

The applying entity has established, or will have established by the time of delegation, policies for handling complaints regarding abuse. Such policies shall be maintained and posted publicly so that anyone

can review them via the Internet and any other means deemed appropriate by the applying entity. The applying entity's policies shall, at a minimum, include appropriate confirmation of receipt of the abuse report, a description of the report review process, and a statement of the actions that will be taken if the applying entity confirms that the report is legitimate.

The applying entity understands that DNS Abuse includes phishing, malware, botnets, pharming, and spam (when used as a delivery mechanism for other forms of DNS Abuse). The applying entity understands and is prepared to contribute to the mitigation or disruption of DNS Abuse in domains within the TLD zone.

The applying entity's abuse response capabilities are resourced appropriately to ensure a timely and adequate investigation and response to reports of DNS Abuse. This includes the capacity to receive and evaluate evidence of DNS Abuse contained in reports, and to take action to stop or disrupt such abuse.

The applying entity is prepared to conduct periodic scans of its zone to identify whether domains are being used to perpetrate DNS Abuse, and to maintain statistical reports of the scans, findings, and actions taken.
