

Applicant Entity: Meditative Mind PTY LTD

ABN: 75 628 629 854

Date: 30 June 2026

To the Internet Corporation for Assigned Names and Numbers (ICANN):

I, Dilpreet Singh Bhatia, in my capacity as Director of Meditative Mind PTY LTD (the "Applying Entity"), am duly authorized to legally bind the Applying Entity.

1. Dedicated Abuse Point of Contact & Reporting Mechanism (SC5.2-1.1, SC5.2-1.2)

The Applying Entity will, no later than the delegation of the applied-for Top Level Domains (TLDs), establish a dedicated abuse point of contact responsible for addressing matters requiring expedited attention and providing a timely response to abuse complaints concerning any name registered in the TLDs. Furthermore, no later than delegation, the Applying Entity will establish, publish, and provide to ICANN the location of a mechanism for members of the public to submit reports of abuse in accordance with the current obligations of the Base Registry Agreement and any applicable Consensus Policies.

2. DNS Abuse Understanding and Mitigation (SC5.2-1.5)

The Applying Entity explicitly understands that DNS Abuse encompasses Phishing, Malware, Botnets, Pharming, and Spam (when used to deliver other forms of DNS Abuse). The Applying Entity understands its obligations and is fully prepared to contribute to the mitigation and disruption of DNS Abuse in domains within our TLD zones.

3. Abuse Handling Policies and Resourcing (SC5.2-1.4, SC5.2-1.6)

The Applying Entity has, or will have at the time of delegation, established policies for handling complaints regarding abuse. These policies will be maintained and posted publicly so that anyone can review them via the Internet and any other appropriate means. These policies will, at a minimum, contain protocols for the appropriate confirmation of the receipt of an abuse report, the process of review of the report, and the specific actions that will be taken if the report is confirmed as legitimate.

Furthermore, the Applying Entity's abuse response capabilities—supported by our contracted Registry Service Provider (RSP)—are resourced appropriately to ensure timely and adequate investigation and response to reports of DNS Abuse. This includes the capability to receive and evaluate evidence of DNS Abuse in reports, and to take definitive action to stop or disrupt the DNS Abuse.

4. Proactive Zone Scanning (SC5.2-1.7)

The Applying Entity, in conjunction with its RSP, is prepared to conduct periodic scans of its zone to actively identify if domains are being used to perpetrate DNS Abuse. The Applying Entity will maintain statistical reports of these scans, the findings, and the subsequent actions taken.

5. Removal of Orphan Glue Records (SC5.2-1.3)

The Applying Entity, coordinating with its RSP, has developed proposed measures and technical protocols for the rapid removal of orphan glue records for names removed from the zone when provided with evidence in written form that the glue is present in connection with malicious conduct

By signing below, I certify that these representations and warranties are accurate and binding.

Authorized Signature:

A handwritten signature in blue ink, appearing to read "Dilpreet", written over a light blue rectangular background.
